

Chers Amis,

Nous sommes ravis de vous accueillir à Paris pour le 7e Congrès Européen de Psychologie Communautaire. La thématique centrale de ce congrès, « Valeurs communes, pratiques diverses », nous permettra durant ces deux jours de questionner l'identité du psychologue communautaire, dans une perspective transculturelle. Nous avons souhaité que ce congrès donne une place importante aux pratiques de terrain, afin de susciter une réflexion sur le rôle et la place des psychologues, des activistes, des usagers et des citoyens dans les politiques sociales, dans les processus de santé globale et dans le développement communautaire. L'Association Française de Psychologie Communautaire est heureuse et honorée de recevoir un public nombreux venu de plus de 30 pays. Ce congrès européen est le premier événement en psychologie communautaire à se tenir en France. Nous souhaitons qu'il soit pour vous une occasion de rencontres, de partage et d'élaboration de partenariats internationaux.

Bon congrès à tous !

Dear Friends,

We extend a warm welcome to the 7th European Congress on Community Psychology in Paris. The main theme of the congress, *Common values, diverse practices*, will allow us to interrogate community psychology from a variety of trans-cultural perspectives. We have asked presenters to initiate debate on theory and practice in relation to global health processes and community development and on the role of psychologists, activists, users and citizens in social politics. The French Association of Community Psychology is honoured to host participants from more than 30 countries to this European congress, the very first community psychology congress to be held in France. We hope that this will be an opportunity to gather, share and develop international partnerships within the field of community psychology!

With best wishes for an enjoyable and successful congress!

Thomas Saias

French Association of Community Psychology President
Président de l'Association Française de Psychologie Communautaire

Pre-Conference Workshop

Wednesday, October 28th

Community Psychology: Common Values and Diverse Concepts or Diverse Values and Common Concepts?

Community Psychology's strengths, although emphasizing common values for decades, may be found more in an active discourse about the diversity of different value sets and theoretical concepts than in a shallow commonality, which may weaken its identity.

The European Community Psychology Association (ECPA) and the French Association of Community Psychology (AFCP) therefore would like to invite especially all colleagues in-charge in national and regional (community) psychology associations and networks for an open discussion about the diversity of concepts, values and philosophical/political backgrounds of community psychology in different areas of the world.

The Pre-Conference Workshop will take place on Wednesday, October 28 from 3pm to 6pm and will be hosted by Maison-Blanche Hospital, Van Gogh room, 6-10 rue Pierre Bayle, Paris XXth arrondissement (Metro: Philippe Auguste, line 2).

Results of the pre-conference workshop will be presented at the 7th European Conference on Community Psychology, October 29/30 in Paris

All participants of the 7th European Conference on Community Psychology and colleagues interested are more than welcome to participate in the discussion.

Admission is free. Please register at contact@eccp-paris2009.com

Wolfgang Stark, ECPA President
Thomas Saias, AFCP President
